Montessori Education With Heart This Fall

A Montessori education where every child's learning path is individualized - and every step forward is guided with intention and warmth.

Spots filling fast!

At Young Explorers, our Montessori teaching philosophy is built around individualized and small-group learning, where intentional guidance helps every child thrive. Integrated with our STEAM curriculum, children develop critical thinking, complex problem-solving, and innovation through hands-on STEAM learning in science, technology, engineering, arts and math. Children are encouraged to explore and make meaningful choices in a prepared environment designed to support their social, emotional, cognitive, and physical growth.
